**THEME: EXPLORING GLOBAL REALITIES OF EDUCATION**

## CONFERENCE THEME: EXPLORING GLOBAL REALITIES OF EDUCATION

### ABOUT THE CONFERENCE

Global Education is understood as an educational concept with philosophical and pedagogical backgrounds. It is global citizenship education that prepares people to fully take up their role as citizens of one world, by exploring world realities, providing information and by developing understanding and respect.

The OIC Higher Education Conference, with the theme of “EXPLORING GLOBAL REALITIES OF EDUCATION” aims to discuss further and share ideas on the global realities that take place in education sector nowadays.

### SESSION 1: THE IMPACT OF GLOBALISATION ON EDUCATION & CULTURE IN OIC COUNTRIES

Globalisation, with its opportunities and its challenges, is neither simply a dream nor a nightmare. It's a new reality that needs a new educational approach. Muslims have to embrace this new reality in order to fulfill their universal mission based on tolerance and understanding of other people's attitudes and behaviours.

Key Focus Area:

- Impact of globalisation on education and culture in OIC countries
- Challenges and opportunities that can influence globalisation
- What are the strategies needed in the education system to face the effects of globalisation?

### SESSION 2: EXCLUSIVE PRESENTATION FROM EDUCATION EXPERTS

### SESSION 3: ENGAGING STUDENTS WITH GLOBAL CHALLENGES

Students need to be prepared to live as global citizens and they need to realize the impact of global and its most pressing problems which require global solutions. At the same time, students have to recognise that their lives and careers will play out on a global stage. This necessitates cross-cultural competencies and other skills for global engagement and understanding.

Key Focus Area:

- How to identify and measure global challenges facing today's students
- What are the consequences of these challenges, if not dealt with?
- What are the strategies needed to overcome global challenges?

### SESSION 4: PRACTICES AND APPROACHES TO GLOBAL EDUCATION

Students today are more likely than ever to interact with people from different backgrounds and cultures. Primary and secondary schools, as well as universities, increasingly recognise the importance of preparing their students for success in a complex and interconnected world. Recent studies have indicated that global education is a necessary development in this rapidly changing world.

Incorporating

Currently, there is no international certifying body that issues and monitors standards for global education, but scholars and organisations have developed a variety of frameworks and approaches for global education.

Key Focus Area :

- Terminology and goals of global education context
- The benefits and values that can be derived from global education
- How can these approaches and frameworks of global education be developed?
